

Objective

The Balanced allocation is designed to generate a balance of capital appreciation and current income.

Philosophy

The Balanced allocation is invested approximately 49% in stocks and 51% in bonds and cash. Both the stock and bond allocations are broadly diversified across different asset classes and managers. The diversification is designed to lower the expected volatility of the portfolios' returns and help protect against negative market environments. The U.S. and international stock allocations have a value orientation to potentially reduce portfolio volatility and downside risk.

Implementation

TIAA Kaspic implements the allocation using an array of carefully screened, low-cost mutual funds. The portfolio is maintained in a custody account at Charles Schwab & Co., Inc., and is rebalanced periodically.

Performance Through March 31, 2018

Trailing Returns							
	Qtr	1 Yr.	3 Yr.	5 Yr.	10 Yr.	Since Inception	Inception Date
Balanced Pool (Net)	-0.9%	7.4%	4.7%	5.8%	6.1%	6.2%	6/30/04
Blended Index	-1.4%	6.1%	4.4%	5.5%	5.7%	5.9%	
Blended Traditional Index	-0.8%	7.1%	5.9%	7.3%	6.7%	6.4%	

Returns are net of investment advisory fees and mutual fund expense ratios. Performance data for periods greater than one year are annualized.
